We Have a New LOGO

We are excited to announce that you will begin to see our new branding, including this logo, on the Web, and on Snowdon merchandise and correspondence. New Snowdon T-shirts will be available at Beers for Bear Cubs! Many thanks to the entrants of our logo contest and to the winning artist, Andrew Walpole of Spring Valley, CA.

It's that time of year again—when bear cubs become orphaned due to a variety of reasons and are received by Snowdon to rehabilitate until they can live on their own. This is one of the 2017 cubs that recently arrived. Proceeds from the Beers for Bear Cubs fundraiser will go towards helping these cubs get off to a good start in the wild.

Summer Snapshots

The Usual...

We are still receiving baby squirrels (tree-dwelling and ground-dwelling varieties) and chipmunks. Most of the time these babies are displaced by downed trees or construction. When grown, they are released into species-appropriate environments.

It wouldn't be summer in McCall without a Canada goose gosling!

... and the Unusual

Recently we had the rare opportunity to rehab a common nighthawk (*chordeiles minor*). During the day, this bird blends in on the ground or tree branches where it rests. It comes out in the evening to eat mosquitoes and other insects. We expect this bird to migrate back to South America in the fall.

Wildlife Education—Learning about Peregrine Flight

Wildlife Ambassador, Indy the Peregrine Falcon, flapped her wings for the audience as Maeghan shared information about Peregrines at the McCall Fly-in on July 15, 2017.

Join us at Ponderosa State Park in McCall for more Snowdon programs on August 9th and 19th, and on September 7th.

Check our Facebook page and website for up-to-date information about our upcoming events.
